Frank Hawkins, Director
Office of International Health Programs (EH-63)
Department of Energy
19901 Germantown Rd.
Germantown, MD 20874

Dear Mr. Hawkins:

*Tom Keene
to clear with
State Dept
Bill Jackson*

*? is all
equipment
under maintenance
program*

This is to request your assistance to the Department of Interior funded Enewetak Resettlement Program. This program, which formerly operated with the logistical assistance of the Department of Energy, is in the process of acquiring excess equipment assets from the Department of the Army, through the assistance of the U.S. Embassy in Majuro, Marshall Islands. We are all concerned that the equipment to be acquired undergo periodic and scheduled maintenance in accordance with the maintenance plan and schedule of the Enewetak community, a copy of which is attached.

We understand the DOE still conducts twice-annual terrestrial science missions to the Enewetak area and that such missions include equipment specialists to maintain the DOE's equipment in the field. May we ask that your specialists be made available on such missions to Enewetak, as their work schedules permit, to assist the community in ensuring its maintenance plan/schedules are being followed with respect to its own equipment, to provide technical assistance as necessary (but not including actual maintenance which is the responsibility of the community's) and to generate a brief report on the status of such equipment after each visit, which DOE could then forward to our office?

We as well as the community would be very grateful for your help.

Sincerely yours,

Allen Stayman, Director
Territorial Affairs office

This is to verify that the Enewetak Field Station, Marshall Islands, does have a Preventative Maintenance Program in place for all equipment under its ownership.

Furthermore, during the U.S. Department of Energy (USDOE) Scientific Mission in the Marshall Islands (approximately twice a year), the USDOE will direct a contractor representative to verify that the maintenance is being performed and recommend any changes, additions, and corrections to the program.

ENEWETAK UJELANG LOCAL GOVERNMENT SUPPORT PROGRAM

EULG/SP OPERATIONS AND MAINTENANCE PROGRAM

The Enewetak Food and Agriculture Program has thirty six employees. The program in addition to equipment listed below has 12 buildings and various small equipment which is under it's operation and maintenance. These consist of a small six room hotel, 4 housing trailers, motor pool shop, electric and refrigeration shop, carpenter shop, office building, generator room, and three storage buildings. The maintenance schedule listed is for heavy and light duty equipment.

If you need any additional information please fax or call our support office in Majuro, MH. The contact information is listed below.
